About our company

FabHotels is a hotel chain business, which is a tech led company. We have a range of products to enable our business across India and help us host B2C customers, B2B & Corporate clients. And we are also venturing into newer tech products (Travelplus) which are also SaaS in nature.

If you have an eye for simple, intuitive and elegant design, if you love the journey of discoverythrough iteration and have relentlessly high standards for delivering innovative and groundbreaking products, we have the perfect job for you!

We are seeking a Product Designer with a passion for finding solutions that allow customers to intuitively use our products. The ideal candidate will be skilled at each stage of the design process but always focused on the needs of the customer.

You will work with other designers and cross-functional team members and will rely heavilyon both qualitative and quantitative data to make informed decisions.

Mission:
